George Washington Bridge

Goethals Bridge

I.T. is... Intelligent Tools

The purpose of information technology is to deliver the right information to the right people – when and where they need it.

The range of possibilities for business communications expands almost every day. Our goal is to identify and implement the **right mix of technology** tools to suit each client's purpose.

I.T. is... Inspired Thinking

The **right technology** doesn't have to be new, sophisticated or expensive. Sometimes the best approach is simple – even free. We'll tell you the truth.

We believe **unbreakable technology** is a better investment than technology that's easy to fix. Other vendors plan on making money from service calls, upgrades and licensing fees. We prefer to design and build durable information infrastructures.

We think our client's deserve technology solutions that real people can use effectively every day. When the right people have the **right tools** to do their jobs well, your organization will achieve its **purpose**.

Imagine That

- ... for your business development project
- ... for your construction project
- ... for your mission impossible project

We deliver I.T. on purpose

Nia (NEE-ah) means having a purpose or reason. It is taken from Swahili, the most widely spoken language on the African continent dating to the 2nd century AD. Our name expresses our mission to enable clients with information technology tools to achieve their specific business purpose.

Since 1999, we have been privileged to serve major corporations and growing firms in New Jersey and New York City.

Clients hire us to solve I.T. challenges, such as:

- I.T. strategy and planning
- Construction I.T. specification development
- Construction support services for remote project sites
- Data migration, consolidation and reconstruction
- Temporary and custom project collaboration networks
- Legacy applications support
- Shared hosted IT networks for multi-tenant office building
- Mission impossible situations where no precedents exist
(Nia provided data recovery and reconstruction of information systems after World Trade Center destroyed/Client: DMJM Harris)

Nia Technologies is certified SBE/MBE

Our company is 100% minority owned and managed. Small business and minority (SBE/MBE) certifications include:

- NJ Commerce and Economic Growth
- NYC Dept of Small Business Services
- Dormitory Authority State of NY
- Port Authority of NY & NJ

Service Guarantee

Nia Technologies has no ties to any specific operating, hardware or software systems or vendors. We act as our client's agent to provide impartial advice and optimal solutions.
